(54) SKIN CLEANLY WIPING AGENT OF MILKY LOTION STATE

(57)Abstract:

PURPOSE: To obtain the titled cleanly wiping agent, adjusted to pH in a specific range, capable of simply and cleanly wiping away attached excrement during change of a diaper, having sufficiently cleaning power and preventing effects on rash of diaper, containing a specific amount of an oil component.

CONSTITUTION: A skin cleanly wiping agent of milky lotion state containing $\geq 20\%$ oil component selected from animal oil, vegetable oil, mineral oil, silicon oil, high alcohol and ester oil and a buffer solution of an organic acid (e.g. aqueous solution of weak acid such as citric acid, lactic acid, tartaric acid or acetic acid and adjusted to pH 4.0W6.0. Since the wiping agent contains a large amount of the oil component, the wiping agent readily removes not only water-soluble dirt but also oily dirt, leaves the buffer solution on the surface of the skin after using the cleanly wiping agent, neutralizes ammonia formed from urine, etc., maintains the surface of the skin in weak acidity and prevents rash of diaper.
